

# RainCatcher 200 Litres Wall Mounted Water Butt

Specification	
Capacity - Litres	200
Capacity - Gallons	43
Height - mm	1150
Length - mm	1150
Width – mm	200
Construction Material	Polyethylene
Code	CH-WB-RC-008-DWT

## Description

The RainCatcher 200 litre water butt features a slim line design which enables it to take up far less space than a conventional water butt. The 200-litre capacity is perfect for collecting and storing rainwater for activities such as watering plants or washing the car. The water butt is manufactured with UV protected Polyethylene making it tough and durable and is available in black only.

With this product there is an option of the RainCatcher filter and diverter kit (at an additional cost). This kit is suitable for drainpipes from 68-110mm diameter and can be used as a simple diverter or as a filter to catch leaves, grit and other debris. Another additional option for this water butt is the 1-metre linking kit. This can be easily used to link together more than one water butt for a larger amount of rainwater storage.

The tank is fully approved on the Water Technologies List with a full 100% capital allowance tax rebate available for commercial installations. The Water Technologies List is provided by Defra and lists approved products which meet set criteria.

### Features

- Great for restricted space
- UV protected and weather resistant
- 5 brass inlet/outlet point for attaching a diverter or linking kit
- Low maintenance
- Height: 1150mm
- Width: 1150mm
- Depth: 200mm
