Description

The Terracottage is perfect for collecting and storing rainwater and with the 160 litre capacity it is ideal for activities such as watering plants or washing the car. This water butt is able to save space with its slim line design and wall mount feature as well as saving money on water bills. The product is manufactured from 100% recycled plastic making it very eco-friendly.

Included in the kit is a downpipe connector which allows the rainwater to flow into the water butt and also stops the tank from overflowing by continuing the flow of water down the downpipe when the tank is full. This water butt will be perfect in any family garden as it includes a child safety lid. Installation is also made easy with this product as it comes with wall brackets and wall plugs, plus the hose connector tap comes pre-installed. This makes easy access for watering cans or the connection of a hose pipe.
