

Utility Tank 1500 Litres Water Butt

Specification	
Capacity - Litres	1500
Capacity - Gallons	329
Height - mm	2000
Length - mm	1200
Width – mm	780
Construction Material	Polyethylene
Code	3PCEL1500BKRTSDWT

Description

This truly versatile tank can be utilised for a whole range of rainwater harvesting applications. The tank has the ability to hold a huge capacity of 1500 litres whilst only using a small footprint and is manufactured with UV protected Polyethylene making it tough and durable. This product enables large scale rainwater harvesting where underground tanks are inappropriate or undesired. The tank would fit nicely on a garden path or installed in a garage or basement. Due to its modular nature it can be installed in a plant room, servicing multiple occupants or businesses. This product offers rainwater harvesting solutions that were never thought possible.

Included in the water tank are x2 ¾" brass threaded BSP ports, x2 DN50 (2") outlet points and x3 market inlet/overflow ports. Taps and diverters can be ordered as additional extras (at an extra cost) which will allow the tank to be easily filled with rainwater falling down the drainpipes and the tap allows easy access for watering cans to be filled or a hose pipe to be connected.

Features

- Huge 1500 litre capacity
- UV protected and weather resistant
- Low maintenance
- Height: 2000mm
- Width: 1200mm
- Depth: 780mm
