Specification	
Capacity - Litres	750
Capacity - Gallons	164
Height - mm	1000
Length - mm	1600
Width – mm	600
Construction Material	Recycled Polyethylene
Code	CH-WB-RC-007-DWT

Description

This RainCatcher water butt is a unique and practical rainwater harvesting solution and with a huge 750 litre capacity it is perfect for activities such as watering gardens and washing a car. Manufactured in Britain with UV protected Polyethylene making it tough and durable and is available in black or green.

With this product there is an option of the RainCatcher filter and diverter kit (at an additional cost). This kit is suitable for drainpipes from 68-110mm diameter and can be used as a simple diverter or as a filter to catch leaves, grit and other debris. Another additional option for this water butt is the 1 meter linking kit. This can be easily used to link together more than one water butt for a larger amount of rainwater storage.

The tank is fully approved on the Water Technologies List with a full 100% capital allowance tax rebate available for commercial installations. The Water Technologies List is provided by Defra and lists approved products which meet set criteria.

Features
