Capacity - Gallons	65
Height - mm	1180
Length - mm	800
Width - mm	400
Construction Material	Polyethylene
Code	3P900037KDWT

Description

The Maurano water butt creates a stylish stone wall effect with a high level of detail to match its high quality. With a generous 300 litre capacity, it is perfect for collecting and storing rain water for activities such as watering plants or washing a car.

Included with the water butt are x3 ¾" brass threaded ports. One can be used for the hi-flow anti-glug tap, included as standard (brass tap with sandstone and chrome tap with charcoal & granite). The others can be used as an interconnector or a point to drain the water butt. The tap will provide easy access to fill watering cans and connect a hose pipe. An additional option (at an additional cost) for this product is the 3P Filter Collector Universal for filtering and collecting rainwater from your downpipe.
